

Natural paint

AURO
Passion for natural paints

VOC FREE

SAFE PAINT

HIGHLY BREATHABLE

PLASTIC FREE PAINT

PLASTIC FREE PAINT

Using conventional paints is like applying a layer of plastic to your wall. Imagine running while wearing a plastic coat, all the moisture from sweating is trapped inside making you damp. Compare this to running with a highly breathable material which allows the moisture to wick away from your body and evaporate. We all wear breathable sportswear, is the same logic applied to our homes?

COMPOSTABLE PAINT

AURO natural paints are so pure they can be disposed of in the household compost bin, returning it to its natural cycle. How many paints providers can say their paint is compostable?

SUFFER FROM ALLERGIES?

The natural ingredients are not alien to the human immune system, and therefore less likely to cause irritation. We acknowledge individuals can be allergic to anything from pollen to peanuts which is why we provide full transparency of ingredients.

*our paint is
vegan friendly*

HIGHLY BREATHABLE PAINT

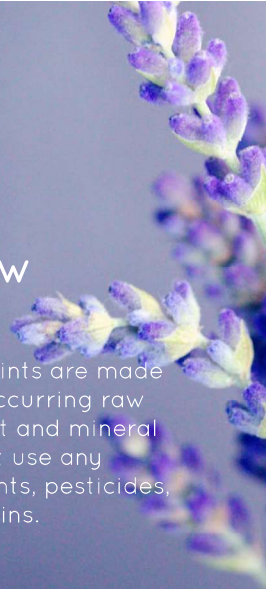

Conventional paints contain plastics which can trap moisture within your walls leading to problems such as damp and mould growth. Our paint enables your walls to breathe by allowing moisture to escape.

NATURAL RAW MATERIALS

AURO natural paints are made from naturally occurring raw materials of plant and mineral origin. We do not use any dangerous solvents, pesticides, herbicides or toxins.

VOC FREE

As we are exposed to an increasing amount of chemicals in our daily lives, our bodies are beginning to react, this is evident in the rise of unexplained allergies, asthma, eczema and other conditions. Our paints are classified as VOC free which means they are not harmful to breathe. We spend on average 90% of our time indoors. What's in the air you breathe?

our paint is wipeable

ADDITIONAL PRODUCT INFORMATION

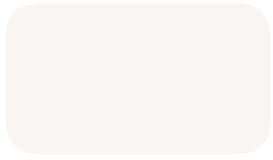

Coverage: 9m²/L

Finish: Matt

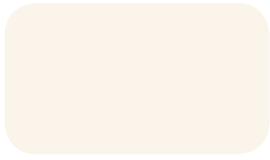

SD Value (Breathability): 0.1 / 0.015

Sizes Available: 1, 2.5 & 10 Litre

100ml Sample pots also available
