

# Installation and User Guide Access Hatch **Deckentüre**

**Before installing the access hatch:**  
 ⚠️ Glue sealing tape into the ceiling opening  
 (see Installation Guide Connection System)

**1** Screw ring eye flush into catch.

**2** For easier installation:  
**Detach hatch door with concealed hinges.**

**3** Place **frame** in ceiling opening and **adjust:**

- even out the surrounding gap (max. 2 cm)  
 - flush to ceiling and at right angles  
 (remeasure diagonals)  
 Underlay and **screw tight** (2x per side).

**4** Click hatch door back into place:

**5** Align hatch door exactly:  
 Adjustments with the appropriate screws:

**6** Adjust magnets for proper closing.

⚠️ Push insulating braid into gap,  
 Glue sealing tape onto frame.  
 (see Installation Guide Connection System)

**Safety instructions:**  
 ⚠️ **Always use tension rod when operating the door!**  
**Do not lean ladder on access hatch door!**

After completion of any other work on the ceiling:

**7** Mount cover profiles:  
 Interlock. Test. Uncover adhesive tape. Press on firmly. Fix.  
 (Installation Guide Cover Profiles)

# Installation Guide Connection System

**!** Always apply sealing tape to ceiling opening prior to installation of attic hatch!  
**Watch ceiling construction!** (see below)

## 1 Glue sealing tape in place:

Cut off in corners and re-apply.

## 3 Push in insulation braid:

With narrow joints the use of the Wellhöfer wedge might be helpful.

Cut off in corners and re-apply. For close connection upset joints in the corners.

**For attic stairs with fire protection FS:**  
 Push in hardly flammable fire protection braid instead of insulating braid!  
 (Installation Guide Attic Stairs FS)

## 4 Close the gap:

If required, cut projecting tape flush with joint angles.

Glue sealing tape to lining bar all over.

## 2 Install attic hatch (Installation Guide Attic Stairs / Access Hatch)

## 5 Install cover profiles (Installation Guide Cover Profiles)

Full effect is gained only if the ceiling connection system has been implemented as described above.

## Correct air-tight connection:

**!** Glue **Wellhöfer sealing tape** tightly and securely onto the **on-site air-tight barrier!**  
**Watch ceiling construction / thermal bridges / fire protection regulations** and where necessary fill additional insulation into gap on-site.

### Concrete ceiling

### Suspended ceiling

### Wodden beam ceiling with counter battens

# Installation Guide cover

**1**

## Interlock frame:

Interlock cover profiles to form a frame with the help of corner joints.
